EDUCATION

University of Illinois Urbana-Champaign

Bachelor of Science in Computer Engineering, Minor in Data Science

GPA: 3.96/4.00

Aug. 2025 – May 2029

EXPERIENCE

Software Engineering Intern

1Rivet India

May 2024

India

- Gained hands-on database administration experience through data backup, recovery, and purging tasks while ensuring the integrity and reliability of the company's data.
- Built and refined the user interface for a manufacturing company's web platform using HTML and CSS, improving its visual and interactive components as a high-school intern.
- Implemented SQL queries and algorithms to store and retrieve company data accurately and efficiently.

Data Analysis Intern

ValU Wealth Care

Dec 2023 – Feb 2024

India

- Developed a strong understanding of stock market analysis, including diversification across small-, mid-, and large-cap companies, and helped formulate investment strategies for clients across varying income levels.
- Used Tableau to build data visualizations analyzing the financial trends of iron and steel industry stocks, including Supreme Engineering Ltd., Hilton Metal Forging, and SAL Steel, assessing their future growth potential from multi-year performance.
- Delivered crucial data insights that informed strategic investment decisions and contributed to client satisfaction.

PROJECTS

Hands-Free Dorm Friendly Dishwasher | *Basic Electronics*

Jan 2026 – May 2026

- Built a fully analog, hands-free dishwashing appliance — no microcontroller. Based on a 555 timer-based sequential system drives the wash cycle through cascaded stages, using counters to step through each phase and LEDs to indicate progress. Designed as a compact, reliable, dorm-friendly build focused on safety and simplicity.

BeatBot-A Robotic Drummer | *C/C++, Embedded Systems, Electronics*

Jan 2026 – Apr 2026

- Built a two-armed robotic drummer capable of playing programmed songs. Used brushless DC motor-driven striking arms which were controlled by Arduino-based code that sequences and times each beat. Primarily contributed on the ECE team, with additional work on the CAD design.

School Library Management System | *Java, SQL*

May 2024 – Jun 2024

- Built a Java and SQL system that modernizes and automates library operations. Made with an aim to manage a collection of 10,000 books and serving 800 students and faculty at my high school.

eduCode Inc. | *Java, HTML/CSS*

Nov 2021 – Jan 2022

- Co-founded eduCode Inc. and led development as a Java programmer, building educational tools to make learning more accessible. Created projects including a Periodic Table Memorisation Tool and an Equations of Motion Calculator, providing useful resources for peers.

RESEARCH

Machine Learning Research | *Pandit Deendayal Energy University*

May 2024 – Jan 2025

- "Comparative Analysis of Machine Learning Algorithms for Air Quality Index Prediction" — Machine Learning for Computational Science and Engineering, Springer, Feb 2025, Vol. 1, Art. 14. DOI: 10.1007/s44379-025-00014-2.
- Reviewed 50+ research papers on methods like KNN and SVM, finding hybrid models delivered the strongest AQI predictions.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, LC-3 Assembly

Tools: Git, GitHub, AutoCAD, KiCAD, Vivado
