Education

University of Illinois Urbana-Champaign | *B.S. Computer Engineering, Semiconductor Minor* Expected Dec. 2028

- **Honors:** GPA 3.96/4.00, Dean's List (Fall 2025, Spring 2026), James Scholar, IEEE-HKN
- **Scholarships:** Grainger Engineering Achievement Scholarship, A.R. "Buck" Knight Scholarship
- **Coursework:** Data Structures, Computer Systems and Programming, Linear Algebra, Discrete Mathematics
- **Illinois ECE:** Grader, ECE 120 Computing; Course Assistant and Grader, ECE 110 Electronics
- **Department service:** ECESAC Academic Committee Member; Front Desk Representative

Skills and Certifications

Technical: Python, SQL, JavaScript, TypeScript, C/C++, Java, FastAPI, PostgreSQL, Supabase, Git, GitHub Actions
Data and AI: Tableau, LLM APIs, Model Context Protocol (MCP), Row Level Security, Root cause analysis
Certified: CFA Institute Investment Foundations; NSE Financial Markets; NSE Mutual Funds; Tableau Desktop Specialist

Projects

Meter, LLM Cost Governance Proxy | *Python, FastAPI, PostgreSQL* Aug. 2026

- A proxy that stops an AI team **overspending** before a request goes out, rather than on the invoice later
- Owned the payments and treasury workstream on a four-person, three-day build: **2,000 lines**, **205 tests**
- Designed charges to record intent before spending, so a lost reply resumes instead of **billing anyone twice**
- Discovered the team's checks had **never run** in CI, then fixed the pipeline and brought all **551** online
- Audited the setup guide as a new user would, logging **45 problems** and fixing **17** the same night

myHR, Multi-Tenant HR Platform | *JavaScript, Supabase, PostgreSQL* Sep. 2026

- An HR platform running a company's directory, onboarding and task boards in one place, with **Slack** sync
- Replaced manual onboarding checklists with **automations** that build a new hire's tasks the moment they are added
- Enforced four-role **access control** with **27** database policies, so permissions hold even if the UI is bypassed
- Opened the platform to **AI agents** through an **MCP server** with **15 tools**, each agent key scoped to a role

WebToWallStreet, Consulting Case-Prep Course | *HTML, CSS, JavaScript* Aug. 2026

- A self-paced **case interview** course for complete beginners, defining every business term the first time it appears
- Structured **40 sections** on case frameworks, **MECE**, market sizing and unit economics, with four practice cases

Experience

Revamp, Agentic AI Consulting at UIUC | *Software Engineer* Sep. 2026 – Present

- **Clearline**: a desktop tool for a medical billing client whose **100-page** weekly batch takes **6 to 9 hours** by hand
- Running the **review and correction** workstream on a student team: the screens where the client checks extracted data
- Kept the client's rule to **preserve values as written**: corrections sit in an overlay and never replace the original
- Took a **616-line** change with **59 tests** through **two review rounds**, CI green on **Ubuntu** and **Windows**
- Delivered the full review flow: load, correct, **approve**, then export a **Medicare** eligibility worklist
- Protected the reviewer's work with **atomic saves** that restore on reopen, so no session is ever lost

Pandit Deendayal Energy University | *Machine Learning Research Assistant* Jan. 2024 – Feb. 2025

- Comparative analyses of **machine learning** forecasting with Dr. Manan Shah: one **Springer** paper, one in review
- **Air quality:** Compared **SARIMA**, **KNN** and **SVM** across published results; found **hybrid models** predict best
- **Rainfall, first author:** Synthesized **70 papers** into a recommendation for **phone-location flood alerts**

1Rivet | *Software Engineering Intern* May 2024

- Built the web screens a manufacturing client's customers used, hand-coding the whole front end in **HTML** and **CSS**
- Wrote the **SQL** that stores and retrieves company records, and ran **backup, recovery and purge** routines on it

ValU Wealth Care | *Data Analysis Intern* Dec. 2023 – Feb. 2024

- A wealth management firm where the analysis fed investment decisions the advisers then put to their clients
- Graphed multi-year performance of **three** iron and steel penny stocks in **Tableau** to judge their growth potential
- Evaluated **small, mid and large cap** diversification to tailor recommendations to clients at each income level

Leadership and Community Service

- **Project Lead, TIDE Foundation** (2023): Raised **Rs. 60,600** to buy **1,000+ books** for **six** local schools
- **Group Leader, Ujjwal Atul Campaign** (2024): Led **15 students** door to door across **300 households**
- **House Captain, Atul Vidyalaya** (2024-25): Elected after a year as Vice Captain; led house assemblies and Sports Day
- **Academic Mentor, Atul Vidyalaya** (2023-24): Tutored **50+** peers and juniors in Physics, Mathematics and CS
